

Curriculum Vitae

DANIEL VITOR MORILHA

Systems Software Engineer with over 15 years of experience building high-performance, resilient, and secure digital communication platforms at leading tech companies like MongoDB, Twilio, Netlify, and Yahoo!. Deep expertise in native C++ development, embedded, multi-threaded programming, low-level networking protocols, and cloud infrastructure.

Technical Skills

Languages	Modern C++, C, JavaScript, PHP, Perl, Python, Bash
OS & Environments	Linux (Gentoo focus), FreeBSD, Docker, Kubernetes, ESP32
Network & Protocols	WebRTC, HTTPS, TLS, WebAssembly, Apache Traffic Server
CI/CD & Tools	CircleCI, Hudson, Jenkins, Git, JIRA

Personal Information

Telephone	+55 (11) 96307-2728	https://linkedin.com/in/dmorilha
Address	São Paulo – Brazil	https://github.com/dmorilha
E-mail	startrix@protonmail.com	

Language Skills Native in Portuguese, Fluent in American English

Work Experience

Employer	MongoDB Dec 2021 – Jun 2022
Position held	Senior Software Engineer
Main activities & Responsibilities	During my brief tenure with the company, I was part of the service architecture team. My responsibilities included fixing long term design bugs in their main product written in C++.
Location	1633 Broadway, 38th floor, New York NY - USA
Business or Sector	Information Technology / Software as a Service
Employer	Twilio Jun 2019 – Jun 2021
Position held	Staff Software Engineer
Main activities & Responsibilities	I was specifically hired to complete Twilio's WebRTC mobile SDK product for video calls running natively on iOS and Android. My responsibilities while with the company were to debug and code in C++, fix bugs and hard synchronization issues, maintain CircleCI's pipelines using Docker, and document progress through JIRA. I have also proudly redesigned the library's signaling and network components to a much cleaner, better and intuitive interface.
Location	101 Spear st. 1st floor, San Francisco CA - USA
Business or Sector	Information Technology / Communication Platform as a Service

Employer **Netlify** | Jul 2018 – May 2019
Position held **Senior Platform Engineer**
Main activities & Responsibilities Responsible for bringing stability to Netlify's CDN platform which leveraged Apache Traffic Server. I also wrote a prototype based on WebAssembly to route HTTPS requests on-the-fly.
Location 44 Montgomery st. suite 300, San Francisco CA - USA
Business or Sector Information Technology / Platform as a Service

Employer **Bosonic Digital Asset Management** | Jun 2017 – Jun 2018
Position held **Staff Software Engineer**
Main activities & Responsibilities Built the initial CD and SSO environments for microservices from scratch using Kubernetes hosted on Google's Cloud Platform. Also helped to establish the core engineering processes and participated directly in technical interviews and team scaling.
Location 570 Pacific ave., San Francisco CA - USA
Business or Sector Financial Services / Cryptocurrency

Employer **Yahoo!** | May 2008 – Jun 2017
Position held **Principal Software Engineer**
Main activities & Responsibilities During my decade long journey with Yahoo I developed, maintained, and deployed new features in several internet consumer products under Yahoo's Search organization reaching millions of DAU. In 2016 I transitioned to Yahoo's Video Ads team to work exclusively with mobile devices. Technologies included PHP, C++, JavaScript, Perl, Bash, FreeBSD, Linux, NodeJS, HTTPS, TLS and Jenkins.
Location 701 First Avenue, Sunnyvale CA - USA
Business or Sector Information Technology / Consumer Media and Advertisement

Employer **IBM Brasil** | Apr 2005 – April 2008
Position held **IT Specialist / Intern**
Main activities & Responsibilities Transitioned from Network Support intern to Application Support specialist, maintaining mission-critical enterprise CRM application.
Location Hortolândia, SP - Brazil
Business or Sector Information Technology / B2B Service Provider

Education

Jul. 2007 Graduate Coursework in Computer Science – UNICAMP – Brazil
Feb. 2006 – May 2007 Specialization in Project Management – IBTA – Brazil
Feb. 2004 – July 2006 BSc in Information System Analysis – IBTA – Brazil
